

ORIX Telematics

Telematics is fast becoming the 'must have' in fleet management. Knowing where your vehicles are at all times increases fleet efficiency, customer service, security and lowers vehicle misuse. With a range of cost-effective tracking devices, our user-friendly, cloud based platform allows you to monitor your vehicles from anywhere.

ORIX telematics is a powerful solution that reveals the hidden daily costs of operating a fleet while placing real-time driver behaviour data at your fingertips. This allows you to moderate driver behaviour and maintain a positive brand reputation.

At ORIX we've developed our telematics system to deliver tangible benefits to our clients, aligned with three critical objectives; increase productivity, reduce expenditure and improve driver performance.

Increase Productivity

- Single sign-on for all fleet management needs.
- Enhanced vehicle utilisation through improved monitoring.
- Improved productivity due to live tracking.
- Reduced administration by using an electronic logbook.

Reduce Expenditure

- Identify fuel savings through idle time and speed management.
- Contribute to reduced crash costs and vehicle downtime.
- May help reduce insurance premiums.

Improve Driver Performance

- Enables easy identification of driving risks.
- Facilitates specific alignment of driver training requirements.
- Establishes measurement for driver reward and culture.
- Provides customisable company benchmarking.

We know that telematic needs may vary from customer to customer, so we have developed three plans featuring a scalable range of functionality that uses the same fundamental hardware: Core, Safety and Safety Plus.

Features	Core \$29 <small>+GST per vehicle per month</small>	Safety \$32 <small>+GST per vehicle per month</small>	Safety Plus \$65 <small>+GST per vehicle per month</small>
4G Network Coverage	●	●	●
Electronic Logbook	●	●	●
FBT Report	●	●	●
Real-time Location	●	●	●
Live Tracking	●	●	●
Trip Data	●	●	●
Route Display	●	●	●
Posted Speed Reporting	●	●	●
Customisable Driver Score	●	●	●
Customisable Alerts	●	●	●
Geofencing	●	●	●
Comprehensive Reporting	●	●	●
Driver Behaviour:			
* Up to 11 Events	●	●	●
* Event Heat Map Display	●	●	●
Vehicle Data:			
* Fuel Consumption	●	●	●
* Engine Hours	●	●	●
* Idle Time	●	●	●
* Average Speed	●	●	●
* Engine Hours	●	●	●
* Distance Traveled	●	●	●
Safety Pack:			
* Seatbelt Sensor		●	●
* 4WD Engagement Sensor		●	●
* Cruise Control Sensor		●	●
Options:			
* Driver ID		●	●
* Duress Button		●	●
* Satellite Coverage			●

Telematic Unit Set Up		
	Unit Cost	Installation Cost
Core	\$349.80 <small>+GST</small>	\$185.00 <small>+GST</small>
Safety	\$664.80 <small>+GST</small>	\$285.00 <small>+GST</small>
Safety Plus	\$1888.80 <small>+GST</small>	\$450.00 <small>+GST</small>

Geofencing - establish and monitor own geozones.

Performance - monitor aspects of vehicle and driver performance.

Trip Analysis - review historical trips and potential route optimisation.

Real-time Tracking - locate and track vehicles on demand.

Customisable Alerts - create alerts for specific events.

Behaviour - customisable scoring system making comparison and risk identification easy.

Consolidated Invoicing - one bill for all fleet costs.

ORIX telematics provides additional insights into the performance of a vehicle fleet. As an integral component of our single sign-on client portal - *ORIX OneView*, we put you in control of your fleet's entire live operational and performance data with a single consolidated dashboard.

From fuel analysis to repairs and telematics, ORIX OneView integrates data from every critical fleet function so you can make informed decisions quickly and easily.
